

CONSTANT TEMPERATURE AND HUMIDITY INCUBATOR

DESCRIPTION

Constant Temperature and Humidity Incubator is controlled with microcomputer to obtain optimal accuracy. It is an ideal testing equipment for natural environment simulation. It comes with functions of constant temperature and automatic humidity control for low water consumption. Its applications range from seed germination, seedling raising, plant growth, microorganism cell culturing, and insects rearing to commercial medicinal, building and timber material performance testing, as well as industrial product quality inspection and constant temperature and humidity experiment.

TECHNICAL PARAMETERS

MODEL	CH-70
Capacity	70 L
Temperature range	With humidification: 10°C to 65°C Without humidification: 0°C to 65°C
Temperature fluctuation	High temperature: $\pm 1^\circ\text{C}$ Low temperature: $\pm 0.5^\circ\text{C}$
Convection	Forced convection
Humidity range	45% to 90% RH
Humidity error	$\pm 5\%$ to 8% RH
Display	LCD display
Exterior dimensions	570 x 560 x 1020 mm
Interior dimensions	420 x 350 x 500 mm
Net weight	59.5 kg
Gross weight	85.5 kg
Power	500 W
Power supply	AC 110V, 60Hz

STANDARD ACCESSORIES

1. Plastic tray
2. Removable and adjustable shelves
3. Hose

KEY FEATURES

1. Overheating and short-circuit protections.
2. Double door structure with high quality glass for easy to observe the samples, the outer door with magnetic trip for good sealing.
3. Soft keyboard and easy-to-use.
