

AUTOMATIC TISSUE STAINER

TECHNICAL PARAMETERS

MODEL	ECO-700
Total containers	18
Container volume	1000 mL
Retention time in each tank	1 s - 99 min 59 s
Overall dimensions	1400 x 500 x 550 mm
Power	400 VA
Power supply	AC 220V, 50/60 Hz

STANDARD ACCESSORIES

1. Container or tanks

DESCRIPTION

Automatic tissue stainer optimizes times during stain process to maximize efficiency in obtention of results for a timely diagnosis. It has smart design, versatility, and precision in staining. It is widely used in universities, histology and pathology departments of hospitals, research institutes and laboratories of forensic medicine.

Ecoshel reserves all the rights to changes in product design, if there are any design change, we will not inform in advance.

KEY FEATURES

1. High efficiency which it can simultaneously run 47 slides or samples (if you use double basket, it more efficiency).
2. Storage and modifications of programs.
3. Auditive alarm if operation is fault, instrument has any trouble or ending program.
4. Dripping retention time to avoid reagent carryover between stations as far as possible.
