

TISSUE FLOTATION AND BAKING PROCESSOR

TECHNICAL PARAMETERS

MODEL	ECO-BSD
Water bath temperature range	RT to 90°C
Heating plate temperature range	RT to 90°C
Display	LCD display
Water bath capacity	2.5 L
Heating plate capacity	24 slides
Water bath size	230 x 230 x 55 mm
Heating plate size	255 x 270 x 15 mm
Dimensions	600 x 390 x 150 mm
Power	≤550W
Power supply	AC 110V±10%, 60 Hz

DESCRIPTION

Tissue flotation and baking processor is an excellent choice for processing paraffin-embedded tissue specimens. The instrument is designed to meet the needs for optimal processing, making it faster and easier. It is widely used in scientific and biomedical research units, medical institutes, hospitals, clinics, pathology diagnostic laboratories, etc.

Ecoshel reserves all the rights to changes in product design, if there are any design change, we will not inform in advance.

KEY FEATURES

1. Intuitive and easy-to-use touch control panel.
2. Water bath with lighting that provides exceptional visibility of the samples.
3. Excellent manufacturing materials simplify and speed up cleaning of the equipment.
