

TISSUE FLOTATION PROCESSOR

TECHNICAL PARAMETERS

<i>MODEL</i>	<i>ECO-BF</i>
Temperature range	RT - 99°C
Control precision	±2°C
Display	LCD display
Overall dimensions	Approx. 385 x 400 x 130 mm
Volume	2.7 - 3.0 L
Power	350 W
Power supply	AC 110V±10%

DESCRIPTION

ECO-BF Tissue Flotation Processor is first-selected product during processing of paraffin tissues specimens. Practical design, memory function and simple setting of temperature greatly improve comfortable and efficiency of laboratory' personal. The instrument is designed to suit needs more demanding. It is widely used in scientific and biomedical research units, medical institutes, hospitals, clinics, pathology diagnostics laboratories, etc.

Ecoshel reserves all the rights to changes in product design, if there are any design change, we will not inform in advance.

KEY FEATURES

1. Control panel is touch-sensitive and easy-to-use.
2. Effective overheating protection system, stand-by operation, and on/off setting function.
3. High quality of materials allows simple and fast cleaning of the equipment.

Ecoshel reserves all the rights to changes in product design, if there are any design change, we will not inform in advance.
