

# TISSUE FLOATATION AND BARKING

## TECHNICAL PARAMETERS

MODEL	ECO-BSD
Temperature range	RT to 99°C
Precision	±2°C
Display	LCD display
Overall dimensions	Approx. 640 x 390 x 140 mm
Volume	2.7 - 3.1 L
Weight	14.7 kg
Illumination	Yes
Power	350 W
Power supply	AC 110V±10%, 60 Hz

## DESCRIPTION

Tissue floatation and barking processor is an excellent choice for processing paraffin-embedded tissue specimens. The instrument is designed to meet the needs for optimal processing, making it faster and easier. It is widely used in scientific and biomedical research units, medical institutes, hospitals, clinics, pathology diagnostic laboratories, etc.

Ecoshel reserves all the rights to changes in product design, if there are any design change, we will not inform in advance.

## KEY FEATURES

1. Control panel is touch sensitive and easy to use.
2. Effective overheating protection system, stand-by operation, and on/off function.
3. High quality materials allow quick and easy cleaning of the equipment.
